## Workshop Outline

Developing integrated projects can be challenging and time consuming. In this very practical workshop you will be provided with lots of resources and exemplars.

We will unpack the methodology of developing an integrated project, and also provide templates for planning as well as providing you with a range of exemplars.

We will also outline how to develop students project management skills and ways to scaffold learning so that there can be a gradual release of responsibility for the learning, moving from dependent learners to learners who can take responsibility for themselves.

Go away with an integrated project to use and lots of new ideas and strategies.

## Learning Intentions

1. How to develop an integrated project based on you and your students passions and interests.
2. Mapping learning activities to learning outcomes, and how to collect valid evidence, suitable for quality assurance purposes.
3. Discuss and consider exemplars and discover how to use in your own classrooms.
4. Take away examples and your own designed project to use in your classroom.
